Polycab Green Wire

High quality electrical wiring is like the veins in a human body, the perfect lifeline of any building. Now more than ever before, we need wires that can ensure power efficiency, deliver greater protection and is planet-friendly too. Polycab Green Wire is the answer to this search. The result of Polycab's relentless pursuit to make lives easier and safer. Polycab Green Wire meets stringent European norms in environmental sustainability and cable safety.

Polycab Green Wire's distinct features make it a one-of-a-kind product:

Eco-friendly:

Manufactured using improved grade raw materials that can be recycled & ensure low carbon emission

High thermal stability:

Leads to high heat resistance and a longer product lifetime

Extra safe:

Its excellent flame retardant properties make it a life-saver

Advance technology application:

The Green Wire insulation is the result of continuous innovation in the field of polymers at Polycab's ultramodern R&D centre, certified by the Indian Ministry of Science & Technology

Higher current carrying capacity:

Compared to FR Wires, superior grade raw materials are used that ensure higher current carrying capacity and greatly enhance the power efficiency

Low smoke density:

This, along with reduced toxic fumes ensures better visibility, thus enabling faster evacuation in the case of an electric fire

Longer life:

Advanced raw materials ensure greater product stability and long lifetime

Manufactured inside a green zone:

To avoid external contamination

Pro-life:

Polycab Green Wire is free of cancer inducing hazardous materials (Cadmium and lead free) RoHS (Restriction of Hazardous Substances) & REACH compliant

Little wonder that Polycab Green Wire has become the preferred choice of conscious consumers and industry professionals known for their uncompromising zeal.

Manufacturing Process

Manufactured at highly integrated Polycab plants in Halol and Daman, equipped with state-of-the-art machinery and crafted by trained and committed professionals; Polycab Green Wire meets every global standard and raises the bar too. All raw materials are first subjected to stringent tests at Polycab's NABL accredited in-house laboratories. This ensures that hazardous and lead contaminated materials never enter the factory floor. Polycab Green Wire once again demonstrates Polycab's leadership role in producing environmentally sustainable products without compromising on its high standards of safety and performance.

Polycab Green Wire is a well thought product that supports sustainable living by saving energy and reducing electrical waste.

Packing Length = 90 - 180 mtrs

POLYCAB, SINGLE CORE, HEAT RESISTANT, FLAME RETARDANT, LOW SMOKE & HALOGEN PVC INSULATED INDUSTRIAL CABLE IN 1100 VOLTAGE GRADE

Nominal area of conductor	No. of strands/Maximum diameter of each strand	Thickness of Insulation	Approx. overall diameter	Current carrying capacity rating	Resistance (Max.) per km. @ 20°C
Sq. mm	Nos. / mm	mm	mm	Amps	Ohms
0.75	24/0.21	0.6	2.25	8.54	26.0
1	14/0.31	0.7	2.60	14.64	18.1
1.5	22/0.31	0.7	2.85	19.52	12.1
2.5	36/0.31	0.8	3.50	26.84	7.41
4	56/0.31	0.8	3.95	34.8	4.95
6	84/0.31	0.8	4.45	44.4	3.30
10	80/0.41	1.0	5.80	61.2	1.91
16	126/0.41	1.0	6.90	81.6	1.21

PERFORMANCE TABLE: CONVENTIONAL WIRE vs GREEN WIRE

Parameters	Conventional Wire	Green Wire
Current Rating	Meets the standard	Improved current rating
High voltage breakdown Resistance	Meets the standard	Improved HV resistance & safe
Insulation Resistance	Meets the Standard	Improved IR & low leakage current
Water Absorption	Meets the standard	Low absorption & safe for long term use
Chemical Resistance	Not mentioned in the standard	Improved chemical resistance & safe to use in hazardous zone
Flexing	Meets the standard	Improved flexing & high fatigue resistance
Fire Properties	Meets the specification	Performs better when exposed to the fire
